

Lifting Trolleys

Electric and mobile lifting solutions

Smart moves
for safe work

Lift Smarter. Lift Safer. Lift with Confidence.

Pronomic is the lifting and moving solutions company, offering smart, smooth materials handling systems for sustainable safety at work.

ABOUT PRONOMIC

About Pronomic

Pronomics goal is to create a safer and more effective work environment for the employees. Wouldn't it be great to avoid strain injuries through better lifting and smarter management of your different manual lifting operations? With our lifting solutions you get more done. All lifting movements are controlled which increases safety in your processes, resulting in fewer accidents involving goods and personnel.

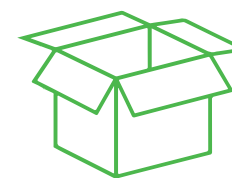

You can lift whatever you want

Our customers use our lifting solutions as a help to handle rolls, drums, crates, sacks, plastic containers, panels, containers or finished products. They provide better lifting and facilitate feeding and refilling of machines, moving materials and tools, installing components in racks etcetera. Our lifting solutions are of the highest quality, and as a market leading manufacturer of lifting equipment we supply bespoke solutions adapted for multiple uses.

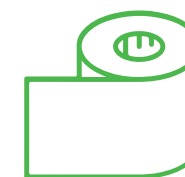

Pronomic is a dependable partner

For over 30 years, our customers have been engaging us to assist them with their difficult lifting challenges within manufacturing and warehousing all over the world. Our personnel have long experience of the industry and are always available for a constructive discussion. In our production plant in Sweden, we develop and manufacture ergonomic lifting equipment aimed for customers worldwide. Our lifting trolleys help to handle items up to 325 kg efficiently, ergonomically and safely. Ergonomic lifting equipment which secures your lifting and contributes to a better and safer workplace. Welcome to Pronomic!

What do you want to lift?

Boxes, and crates

Rolls and reels

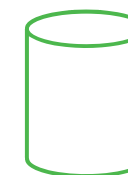

Buckets

Barrels

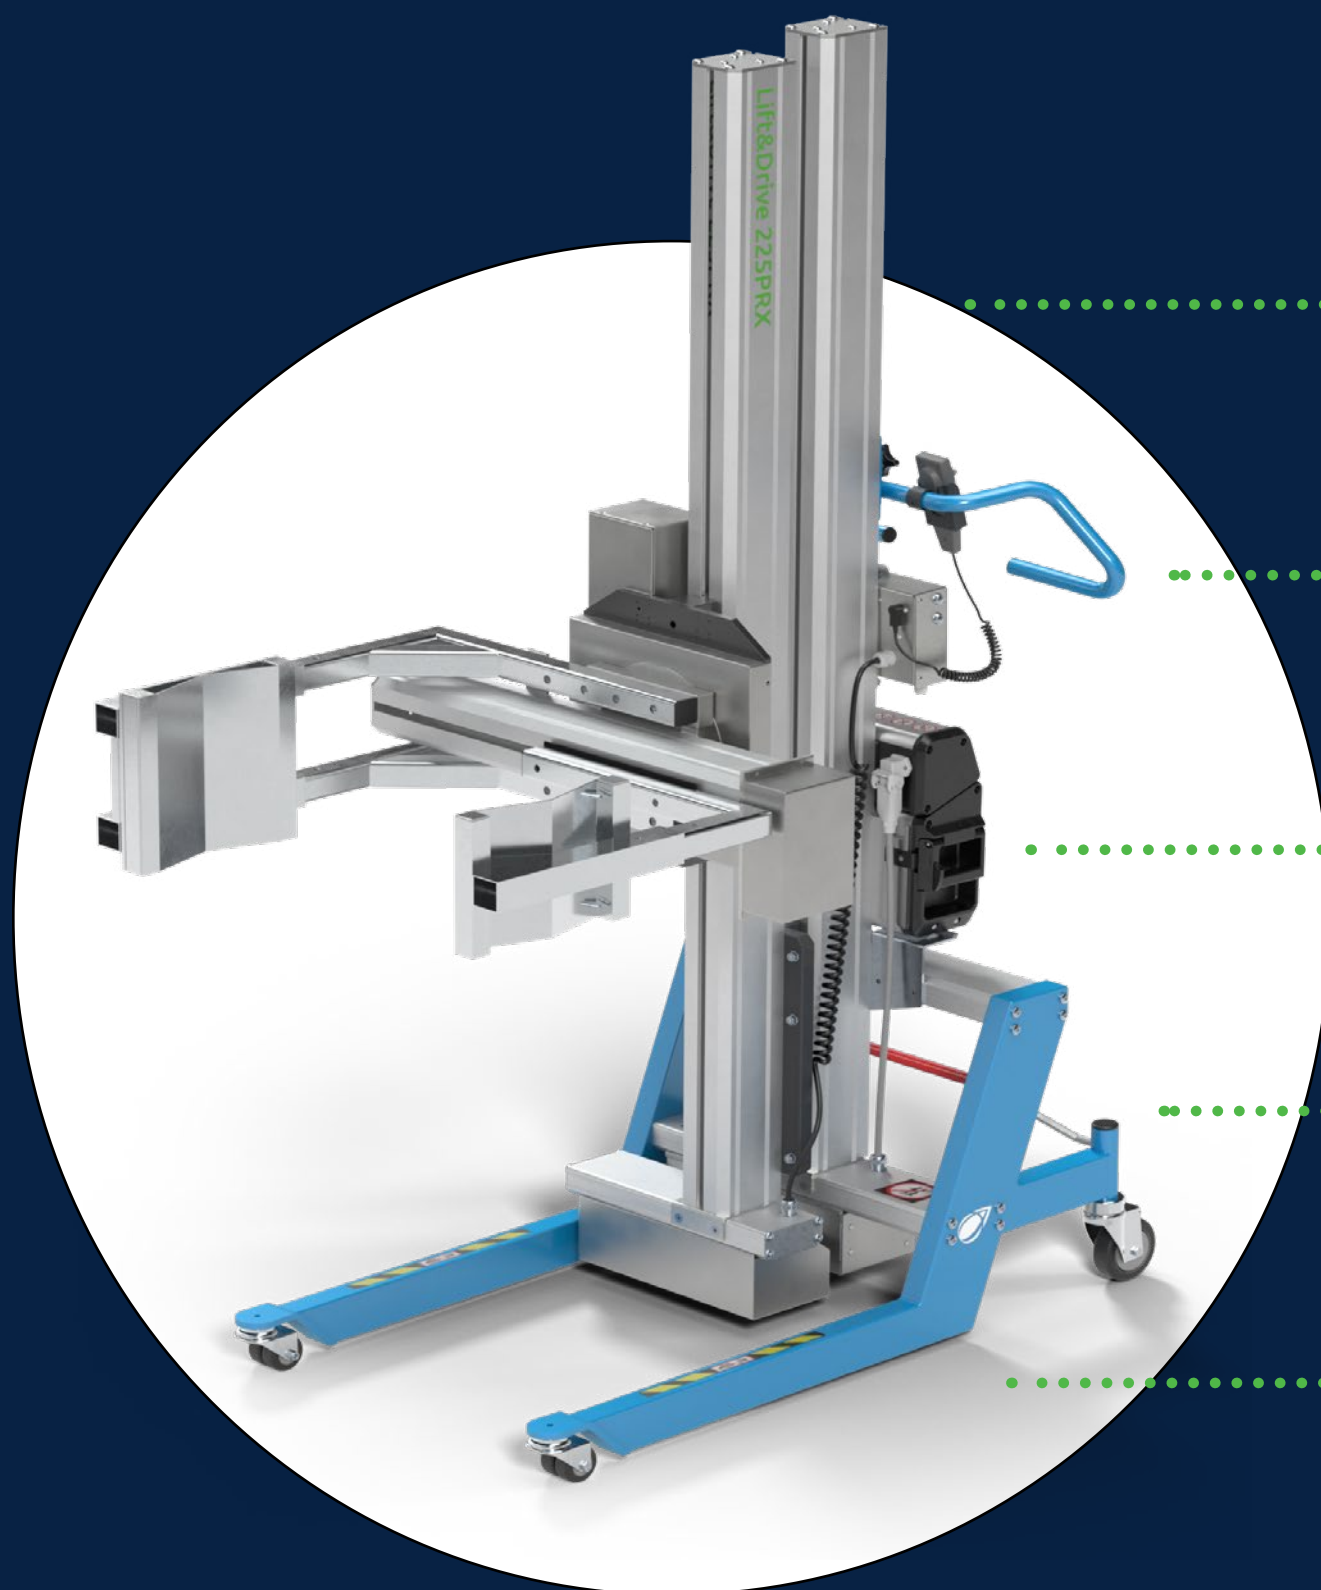

Filling tube

Funnel

Modular design

We offer a modular product concept, allowing you to adapt and customize your solution to best fit your specific needs.

Customize your solution

The modular concept is the basis of our solutions, which gives you almost unlimited possibilities to build a lifting solution completely adapted to your needs. This possibility concerns our lifting trolleys, Cranes and Scissor tables. On this page you can see an example of our modular lifting trolley and the parts that are flexible. Since every workplace is different, we find it outmost important to make our solutions adaptable, and ergonomic to enhance your safety at work.

Column

The lifting columns are available in various standard heights and can also be custom-made to provide the exact desired lifting height. As an alternative, a telescopic lifting column is also available, offering double the lifting height.

Tools

We have a wide range of standard tools such as load platforms, forks, control and counting scales, as well as Squeeze&Turn. In addition to this, we also manufacture many customer-specific tools.

Battery

Our battery is lightweight with extended longevity, designed for ergonomic handling. It can be quickly and easily removed or installed, ensuring efficient and seamless operation.

Chassi

We offer variable widths, heights, and lengths for the chassis, as well as custom-made chassis.

Wheels

To best adapt the trolley to the needs of the workplace, we offer wheels in various sizes and materials.

What happens next?

Discover Your Needs

Have you considered how you can improve the working environment and efficiency in your production? One way is to review how your manual lifting operations are currently handled. By investing in better lifting technology, you can both reduce the risk of strain injuries and increase productivity. With our lifting solutions, you can perform all lifting movements in a controlled and safe manner. This leads to fewer accidents, both for your staff and the products being handled. We always start from your specific needs and offer customized solutions that provide you with safety and improved workflows.

Create a Solution

Every production has unique needs, and we understand the importance of tailoring lifting solutions that truly work for your business. That's why our second step is to create a solution together with our customers. This could involve lifting solutions that efficiently handle everything from rolls and drums to boxes, sacks, plastic containers, panels, and containers. Whether it's feeding machines, moving materials, assembling components, or replenishing supplies, we will find a solution that fits. As a market-leading manufacturer of lifting equipment,

we are experts in developing customized solutions. Through close collaboration with you, we create products that meet your specific needs and are of the highest quality. Together, we ensure your production becomes both safer and more efficient.

Build an Optimized Solution

Our final step is always to build an optimized solution specifically for your needs. Our experienced staff is available to discuss your challenges and, together with you, develop the best possible solution. At our production facility in Sweden, we design and manufacture ergonomic lifting equipment that efficiently handles items up to 325 kg. We ensure that our lifting solutions are not only effective and safe but also ergonomic, contributing to a better working environment. No matter where in the world you are, we make sure your lifting processes become both safer and more productive.

3. Build an optimized solution

Lifting Trolleys

About Lifting trolleys

Our customizable lifting trolleys improve workplace safety by reducing injuries. Battery-operated, low-maintenance, and equipped with safety features, they ensure reliable and secure handling.

Advantages

Since 1989 our lifting trolleys has ensured a better working environment while also reducing the number of employees on repetitive-strain injuries. Lifting becomes easier and safer therefore reducing the risk of injury. We design and manufacture our trolleys ourselves so they are available in various sizes, designs and models. The range of models offer many different possibilities because they can be customized. This guarantees that you get a trolley that meets your need perfectly. The lifting trolley is battery operated and requires very little maintenance.

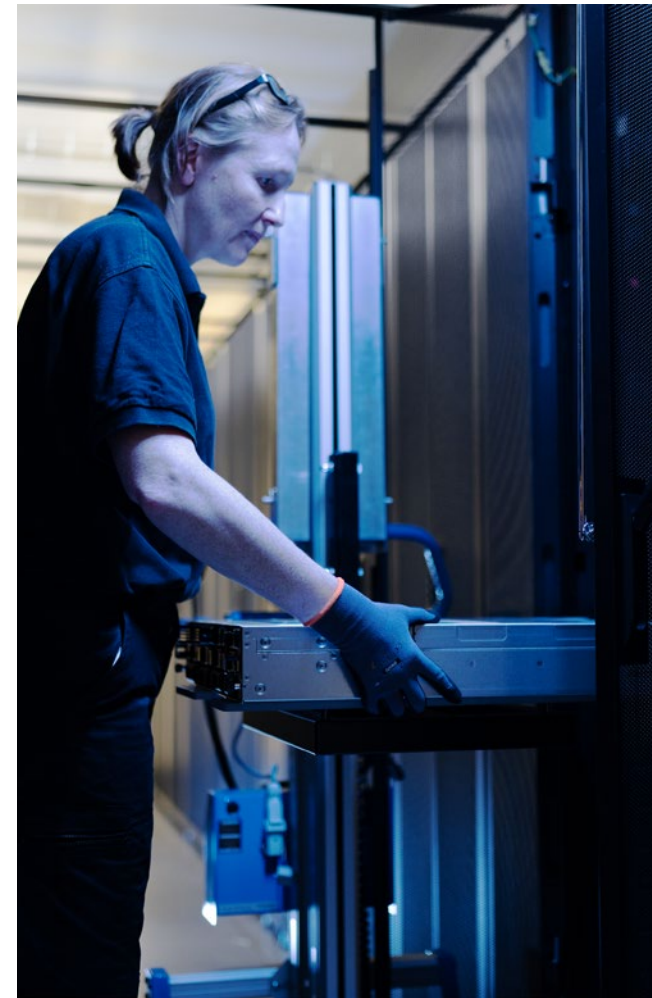

Which trolley suits you best?

All our lifting trolleys are equipped with a built in safety clutch to avoid risk of squeeze and tipping injuries. Our entire range of lifting trolleys are available in painted or stainless steel.

We have 5 categories of lifting trollies for different purposes. To your right you'll find our collection.

Secure handling

For maximum safety, all Lift&Drive trolleys are equipped with a built in safety clutch, which automatically disengages when lowering the load if it should encounter an obstacle. The column has a screw drive which makes them reliable and durable over many years of service.

Where can you use a lifting trolley?

The lifting trolleys offer considerable advantages across various industries, boosting workplace efficiency and safety. Here are some examples of environments where our trolleys have played a crucial role in enhancing both efficiency and ergonomics:

- Data centers
- Pharmacies
- Industrial environments
- Libraries
- Supermarkets

Our trolleys are designed to reduce physical strain from manual lifting and repetitive motions, these trolleys promote a healthier work environment, helping to prevent fatigue and minimize workplace injuries.

Which trolley suits you best?

Our range of trolleys

Pronomics range of lifting trolleys bring a truly modular concept to ergonomic lifting, manoeuvring, and manipulating a wide range of products and materials: boxes, cartons, crates, barrels, drums, rolls, tools and components, or finished products.

Lift&Drive ECO Range

The smallest lifting trolleys

They are available in both standard and industry-adapted designs. The chassis is neat and narrow, which makes it smooth and easy to maneuver.

These trolleys are suitable for environments such as:

- Pharmacies
- Libraries
- Retail and Wholesale

Lift&Drive PRX Range

The strongest and most flexible lifting trolleys

Largest, most stable, powerful and most flexible trolleys suited for industrial environments.

The unique and proven modular concept with associated tools provides unlimited possibilities to solve your need.

These trolleys are suitable for environments such as:

- Food&Beverage
- Manufacturer
- Pharmaceutical, Chemical and Medical manufacturing

Lift&Drive IE Range

The middle range of lifting trolleys

For demanding industrial environments with a fully welded chassis, which gives the solution a good stability.

These trolleys are suitable for environments such as:

- Logistics and distribution
- Maintenance
- Commercial kitchen

Lift&Drive DC Range

Server and battery lifters

Data Center trolleys have a truly compact design and are easy to move around in tightly designed data centres. They have the markets lowest reach down to 1 U but can still reach as high as to 60 U.

These trolleys are suitable for environments such as:

- Data Centers

Lift&Drive ECO

Lift&Drive ECO range is the most compact electric lifting trolleys that are easy to use and stow away.

ABOUT

It's easy to use and easy to stow away, making them ideal for work environments like canteens and kitchens, offices, libraries, or shops.

Safety clutch

The trolleys are smooth and stable to use, with a lifting capacity of up to 90 kg. The handlebars are easily adjusted to suit any operator, and safety features such as overload protection and safety clutch make the trolleys safe to use also by inexperienced operators.

Minimal maintenance

Low roll resistance combined with optimal weight to capacity ratio enables ergonomic and safe lifting without risk of strain. The durable, high-quality build requires only minimal maintenance.

Technical data	70ECO - 90ECO
Height	1443 - 2193 mm
Length	734 mm
Width	435 mm
Min Weight	31 kg
Max load Capacity	70 kg
Max Lift Speed	83 mm/s
CE Mark	Yes

Quis voluptatem fugiat etur, audiaes sequatem delendipic tota a sitat. bhcacblehcgqab

Lift&Drive IE

Lift&Drive IE range are simple but capable electric lifting trolleys and have wider and longer chassis compared to the ECO range.

ABOUT

The IE range are easy to use and easy to stow away, making it ideal for work environments like canteens and kitchens, offices, libraries, or shops – as well as more industrial applications.

Smooth handling

These trolleys are smooth and stable to use, with a lifting capacity of 90 kg. The handlebars are easily adjusted to suit any operator, and safety features such as overload protection and safety clutch make the trolley safe to use also by inexperienced operators. Thanks to the motor brake, loads can be kept in an elevated position for longer.

An ergonomic choice

Low roll resistance combined with optimal weight to capacity ratio enables ergonomic and safe lifting without risk of strain. The durable, high-quality build requires only minimal maintenance.

Technical data	90IE
Height	1687 - 2182 mm
Length	771 mm
Width	555 mm
Min Weight	45 - 95 kg
Max load Capacity	90 kg
CE Mark	Yes

A modular design

Lift&Drive PRX

The Lift&Drive PRX range consists of speedy electrical lifting trolleys with lithium-ion battery option and an accurate and smooth lifting motion that provides good feel, control, and sense of security.

ABOUT

Modular design provides versatility, with a wide range of lifting tools and other options. This lets you customize the trolleys for a specific duty. The trolleys high-quality design is sturdy and reliable, requiring only minimal maintenance.

Load capacities

Personalise your Lift&Drive PRX to meet the handling requirements in your premises. The load capacities are: 90 kg, 130 kg, 175 kg, 225 kg, or 325 kg. All this with the best ratio between own weight and load weight.

Safe lifting

Low roll resistance combined with optimal weight to capacity ratio enables ergonomic and safe lifting without the risk of strain. The rear wheels are equipped with an easy-access central brake system which also includes directional lock.

Technical data	90PRX	130PRX	175PRX	225PRX	325P
Height	1672 - 2232 mm	1672 - 2732 mm	1947 - 3000 mm	1947 - 3000 mm	1950 - 2950 mm
Length	880 - 1304 mm	880 - 1304 mm	959 - 1384 mm	959 - 1384 mm	962 - 1356 mm
Width	550 - 1390 mm	550 - 1390 mm	576 - 1300 mm	576 - 1300 mm	712 mm
Min Weight	44 kg	48 kg	62 kg	65 kg	102 kg

Max Lift Speed	83 mm/s	132 mm/s	78 mm/s	65 mm/s	65 mm/s
CE Mark	Yes	Yes	Yes	Yes	Yes

Easy to maneuver

Lift&Drive DC

The Data Center range have trolleys that are compact and ergonomic, which are ideal for tight data centers. They are easy to maneuver in confined spaces with swiveling wheels and a central brake system.

ABOUT

Our trolleys have a truly compact design and are easy to move around in tightly designed data centres. They have the markets lowest reach down to 1 U but can still reach as high as to 60 U.

Low roll resistance

The deadweight of the trolleys are next to none and in combination with 4 swiveling wheels the trolley is truly light to operate. The low roll resistance and electrical lifting power makes these trolleys a truly ergonomic and safe server lifter solution. The rear wheels are equipped with an easy access central brake system that also includes directional lock.

Load capacity

The max lifting capacity is 90 kg, and the trolleys are smooth and stable. They have a sturdy, reliable and high-quality design and require a minimum of maintenance.

Technical data	DC09U42	DC09U52	DC15U42	DC15U60
Max Height	2376 mm	2839 mm	2420 mm	3229 mm
Max Length	816 mm	960 mm	1058 mm	1209 mm
Min Width	550 mm	565 mm	639 mm	648 mm
Min Weight	65 kg	85 kg	95 kg	122 kg
Max load Capacity	90 kg	90 kg	150 kg	150 kg
CE Mark	Yes	Yes	Yes	Yes

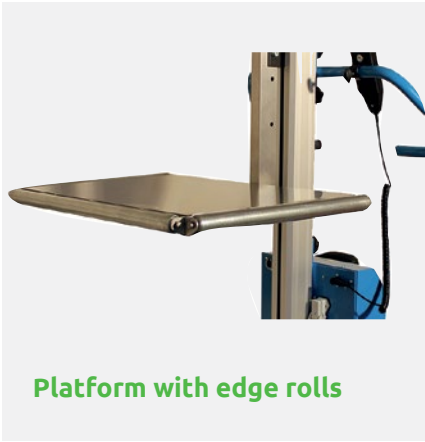

Lifting trollies

Tools

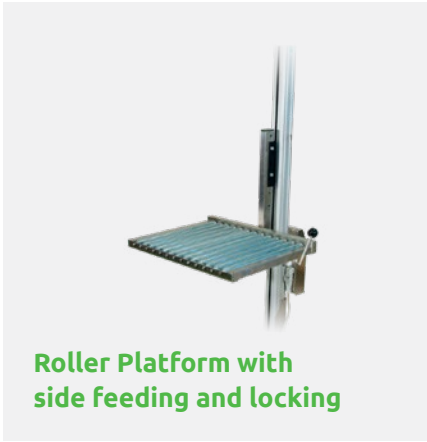

Pronomic provides lifting and moving solutions that meet the high demands of the manufacturing industry, including strict hygiene and antistatic requirements when needed. We can tailor solutions that empower your workforce to handle materials, components, and tools safely and without strain – boosting productivity by freeing up labour. Just like you, we take pride in delivering high-quality products that are built to last, with all the necessary documentation.
